

# Integrations with

# Microsoft

[mangoapps.com](https://mangoapps.com)

# Introduction

MangoApps seamlessly connects with all Microsoft products, eliminating tool sprawl and creating one unified platform.

By integrating MangoApps with Microsoft systems, users can stay focused, leading to effortless communication and collaboration and increased productivity and engagement.

# User Authentication & Provisioning

**MangoApps seamlessly integrates with Microsoft's ecosystem, leveraging existing tools and capabilities in Active Directory, ADFS, and Azure.**

- Enhance security by centralizing management, which reduces risks and enforces security policies.
- Streamline the user experience through Single Sign-On (SSO) and Multi-Factor Authentication (MFA), making logins simpler and boosting productivity.
- With SCIM and Azure, automate user provisioning, easing the IT workload and ensuring efficient user management.

# Active Directory

Enhance security with centralized control.

- Sync profiles and permissions in real-time.
- Keep MangoApps updated with current user statuses.
- Sync AD users with MangoApps easily.
- Eliminate separate credentials and streamline access.

The screenshot displays the ACME Admin portal interface. The left sidebar contains a navigation menu with options: Home, Domain, Users, Modules, Navigation, Email, SSO, Connections (highlighted), Applications, Search, Automation, Notifications, Security, Compliance, Moderation, Governance, Social Advocacy, Integrations, Branding, and Reports. The main content area is titled 'Single Sign-On (SSO) > Connections > Active Directory/LDAP'. It features tabs for 'Active Directory/LDAP', 'SAML', 'OAUTH 2.0', and 'Custom SSO'. A checkbox labeled 'Enable Active Directory/LDAP Integration' is checked. Below this, there is a section for 'Connection Settings' with an 'Add New Server' button. The 'Server 1' configuration includes:
 

- Server Type:** Active Directory
- Host Name:** machine.example.com
- Port:** 389
- Base DN:** dc=example,dc=com
- Group Base DN(Optional):** dc=example,dc=com

 The 'User Setting' section includes:
 

- UPN Suffix:** @company.local
- Override UPN Suffix:** (checkbox)

 The 'Authentication' section includes:
 

- Admin Login ID:** administrator

# SAML

Boost security with centralized authentication.

- Secure communication between MangoApps and IdP.
- Authenticate users with Single Sign-On (SSO).
- Access MangoApps with Microsoft credentials.
- Reduce logins and password fatigue.

**ACME** Admin portal

**Single Sign-On (SSO) > Connections > SAML** [Add SSO Connection](#)

Active Directory/LDAP **SAML** OAUTH 2.0 Custom SSO

WITH SAML SSO CONNECTIONS YOU CAN

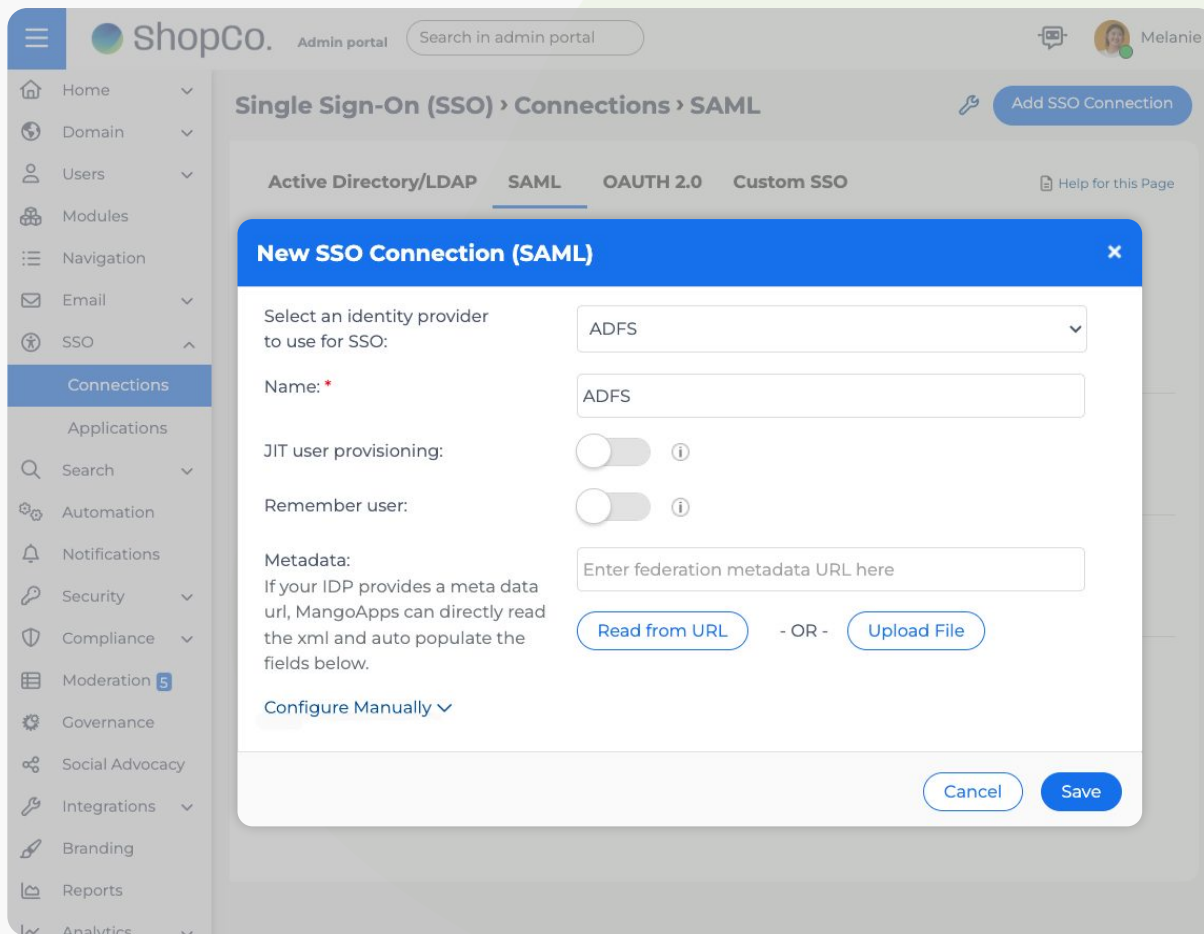

- Enable Single Sign-On with purchased applications like Okta, ADFS, OneLogin and others in your enterprise
- Have the SSO connections be automatically listed on the MangoApps login page for your users to use them to authenticate
- Use SCIM based automatic provisioning & de-provisioning of users when SSO is with OneLogin

	MangoApps	<a href="#">Manage Settings</a>	<a href="#">Configure User Mappings</a>	<input checked="" type="checkbox"/>
	Okta	<a href="#">Manage Settings</a>	<a href="#">Configure User Mappings</a>	<input checked="" type="checkbox"/>

# ADFS

Connect on-premises AD with MangoApps.

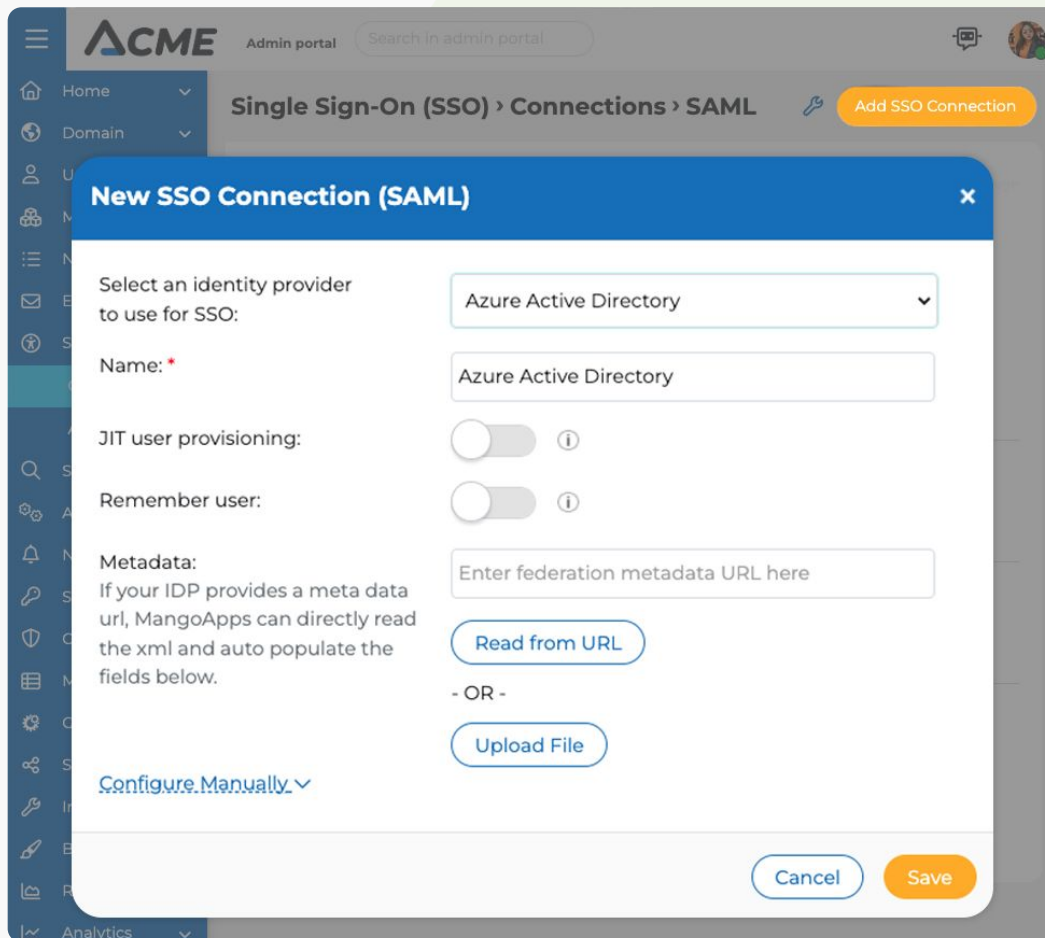

- Enable seamless SSO login for users.
- Extend AD to authenticate MangoApps users.
- Provide secure access via federated trust.

# Azure Active Directory (Entra ID)

Manage cloud identities and sync with MangoApps.

- Auto-provision users, update roles, and revoke access.
- Direct integration for secure access and role management.

# OAuth 2.0 Microsoft 365

Simplify access with familiar Microsoft login processes.

- Authorize access without exposing user credentials.
- Enhance security with Microsoft 365 login credentials.

Active Directory/LDAP
SAML
OAUTH 2.0
Custom SSO

WITH OAUTH 2.0 SSO CONNECTIONS YOU CAN

- Enable Single Sign-On with purchased applications like GoogleApps, Microsoft 365 and others in your enterprise
- Have the SSO connections be automatically listed on the MangoApps login page for your users to use them to authenticate

Name of the field in your JWT/id\_token, should contain the unique identifier for user.

# Multi-Factor Authentication (MFA)

Add extra security with a second authentication form.

- Combine passwords with Authenticator App for access.
- Protect accounts even if passwords are compromised.

# User Authentication & Provisioning

## How Customers Use This:

By integrating MangoApps with Microsoft Active Directory, ADFS, Azure Active Directory (Entra ID), and SCIM, organizations automate new employee onboarding, ensuring instant access based on roles and locations, and automatically manage access changes or terminations for security.

Single Sign-On and Multi-Factor Authentication are implemented by our customers to simplify logins while reinforcing security protocols.

For instance, retail clients use SCIM to efficiently provision and de-provision seasonal staff.

## Benefits:

- **Improves onboarding and offboarding speed:** New hires gain immediate access; departing employees are deprovisioned automatically
- **Reduces IT workload:** Automates user lifecycle management and eliminates repetitive manual tasks
- **Strengthens security:** Centralized identity control with SSO and MFA reduces risk of unauthorized access
- **Ensures compliance:** Automatically aligns user access with internal policies and regulatory requirements
- **Enhances employee experience:** Employees use familiar Microsoft credentials to access MangoApps—no separate usernames or passwords to manage

# File Management & Sharing

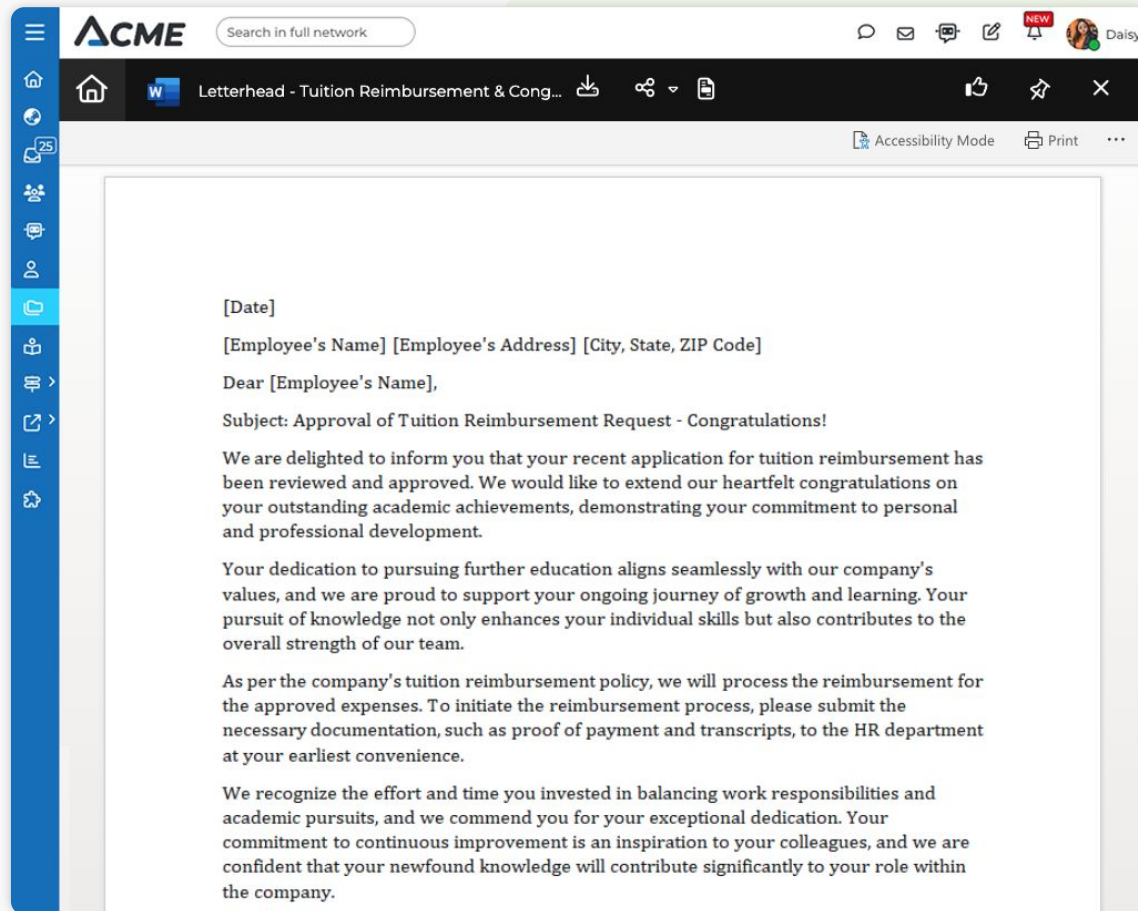

**MangoApps' integrations with Microsoft file repositories, like SharePoint and OneDrive, simplify sharing and editing documents across platforms.**

- Improve collaboration efforts through real-time document editing with Microsoft permissions.
- Offer cost efficiency by allowing file viewing without extra licenses and enable editing directly in MangoApps.
- Enhance workflows and productivity by reducing the need to switch between different platforms when editing and searching for documents.

# View MS Office Files in MangoApps

View Word, Excel, and PowerPoints within MangoApps.

- Read-only access to Office docs via secure APIs
- No individual Office license needed for viewing.
- Reduces costs and barriers for team access.

# Edit MS Office Files in MangoApps

Edit Word, Excel, and PowerPoint docs without switching apps.

- Familiar Office experience in MangoApps.
- Changes auto-save; no work is ever lost.
- Comment, track changes, and improve communication.

The image shows a screenshot of the MangoApps interface. On the left, there is a navigation sidebar with various icons. The main content area displays a document titled "CABLE INC Company credit card policy". The document content includes sections like "Policy brief & purpose", "Scope", "Policy elements", "How does a company credit card work?", and "Employee credit card agreement".

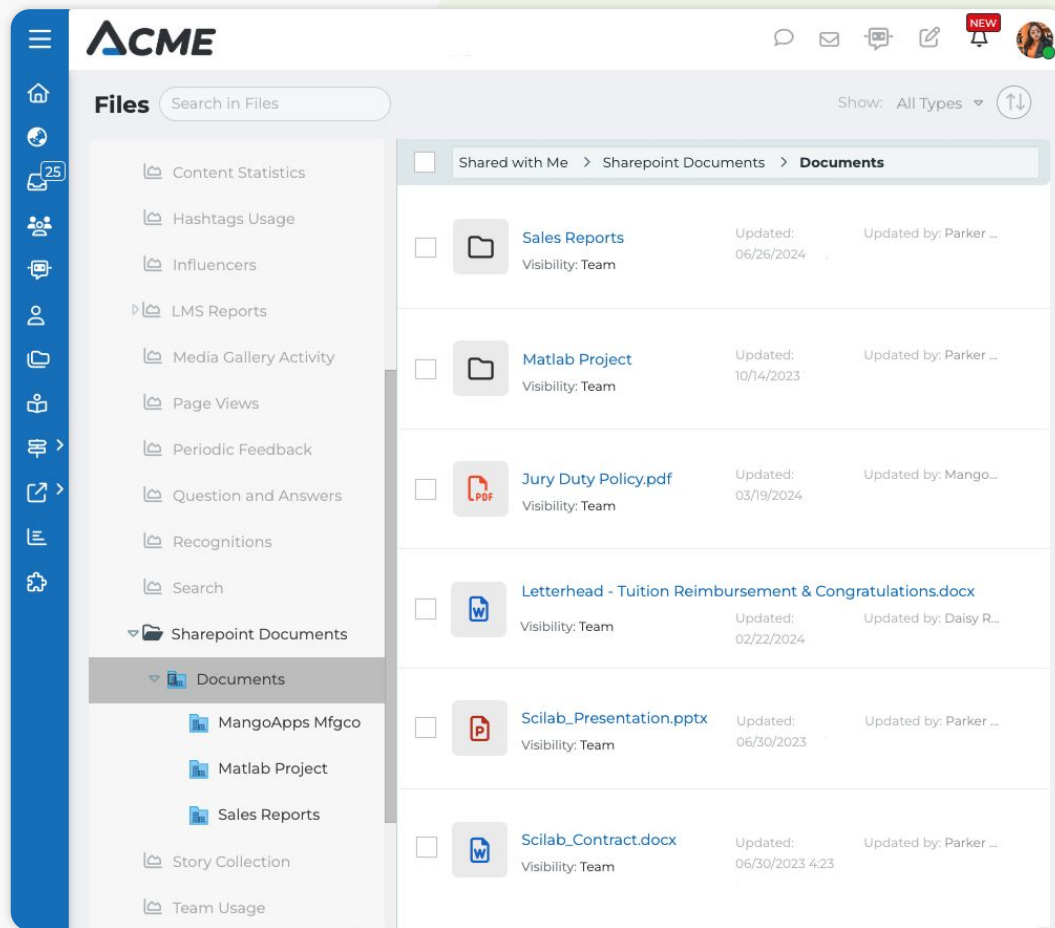

Overlaid on the right side of the document is a Microsoft Word editor window. The editor title bar reads "CableInc Credit Card Policy - Saved to MangoApps". The ribbon shows the "Home" tab selected, with options for "File", "Home", "Insert", "Layout", "References", "Review", "View", and "Help". The font settings are set to "Arial Bold" size "20". The document content in the editor matches the content shown in the viewer, including the "CABLE INC" logo and the "Company credit card policy" title.

A green arrow points from a blue Word icon to the editor window, indicating the integration between the two applications.

# Sync Files from SharePoint & Teams

Map SharePoint and Teams folders to MangoApps.

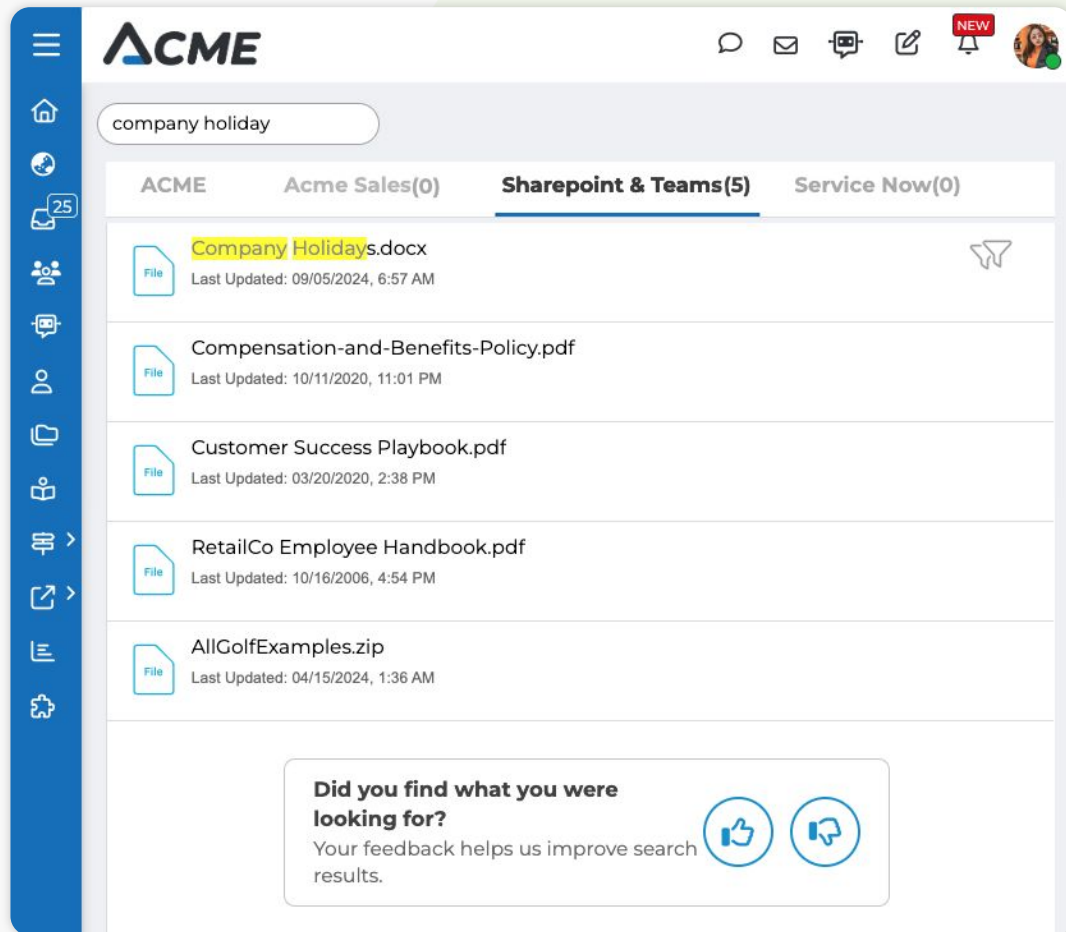

- Keep files up-to-date with real-time syncs.
- Access latest versions without manual uploads.
- Access linked files even with differing permissions—for all teams and roles.

# Mapped Files in Federated Search

Mapped SharePoint files appear in MangoApps searches.

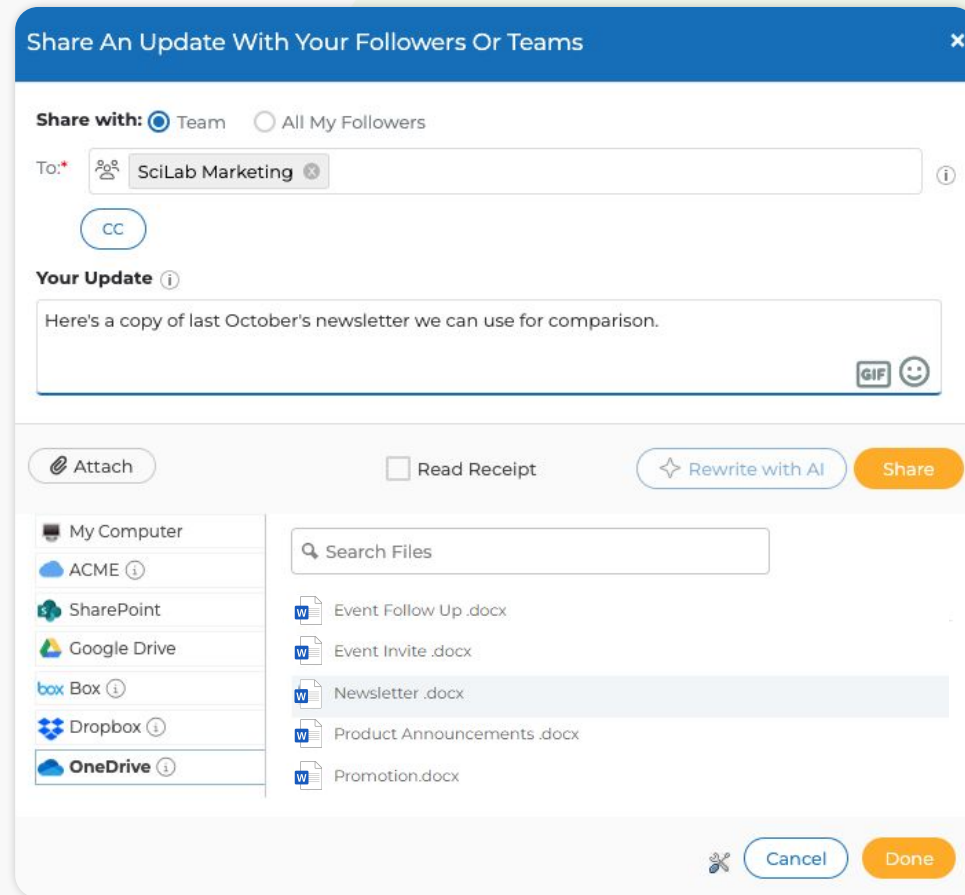

- Search and find files across platforms easily.
- Enhance document discoverability and save time.
- Federated Search offers Service Account-Based and User Account-Based integrations.

# Files From External Repositories

Link SharePoint and OneDrive to MangoApps.

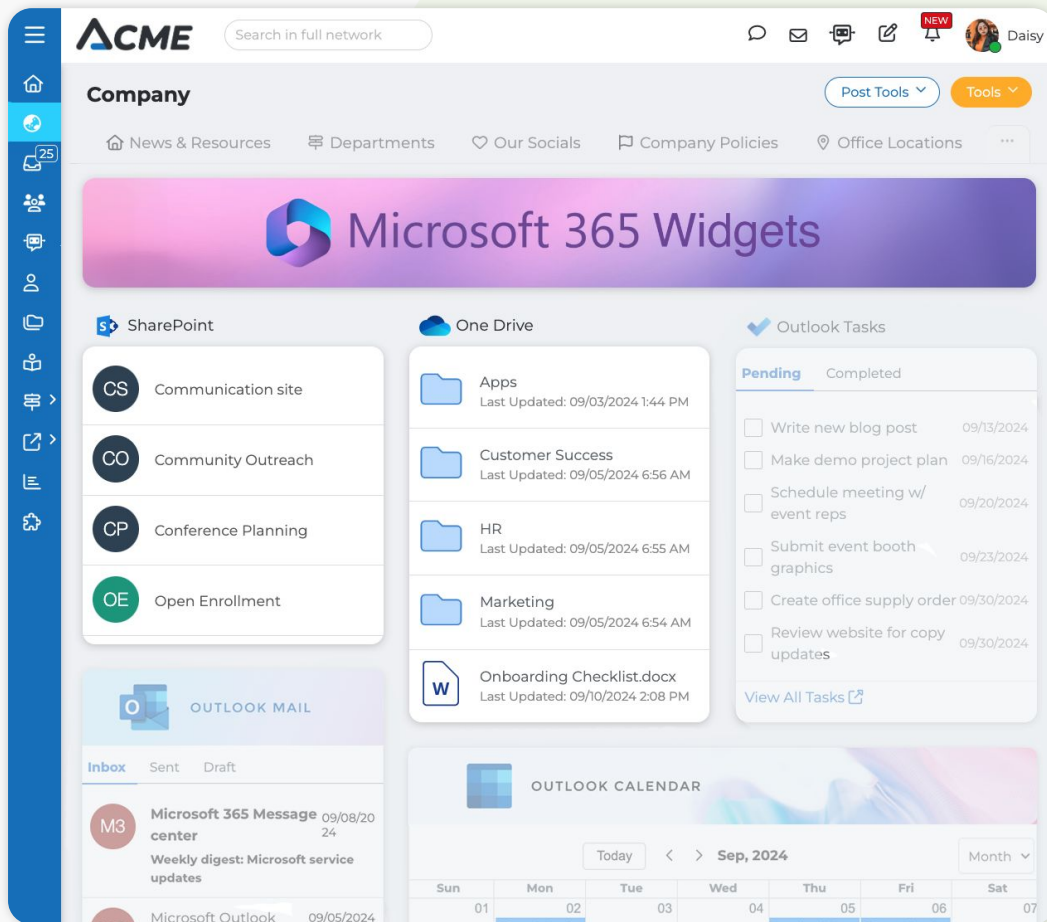

- Access, upload, and share files directly in MangoApps.
- Manage files in original Microsoft formats seamlessly.
- Collaborate quickly without manual downloads or emails.

# SharePoint & OneDrive Widgets

Access and manage files without leaving MangoApps.

- Widgets pull content directly from SharePoint and OneDrive.
- Boost productivity with quick file access in your workspace.
- Create a centralized hub for easy file collaboration.
- Microsoft 365 file permissions apply.

# File Management & Sharing

## How Customers Use This:

Organizations use MangoApps to streamline file collaboration across teams by integrating with SharePoint and OneDrive. Employees directly access and edit Microsoft Office files within MangoApps' workspaces, eliminating the need to switch platforms.

For example, a marketing team collaborating on a campaign proposal can co-edit the Word document in real time, while sales reps can access up-to-date pricing sheets from a synced SharePoint folder, all without leaving MangoApps.

Admins map SharePoint/Teams folders to MangoApps libraries and set role-based access so that files are automatically available to the right people—no need for repeated file uploads or manual permission changes.

Federated search even allows users to find relevant documents across both MangoApps and Microsoft repositories from a single search bar.

## Benefits:

- **Eliminates platform switching:** Access, edit, and manage files from SharePoint and OneDrive without leaving MangoApps
- **Streamlines collaboration:** Real-time co-editing of Office files using familiar Microsoft tools embedded inside MangoApps
- **Reduces IT overhead:** One central interface for content access and permissions, minimizing duplication and confusion
- **Increases document visibility:** Federated search improves discoverability of content across systems
- **Saves on licensing costs:** Users can view Office files in MangoApps without needing individual Office licenses
- **Boosts productivity:** Teams can work faster and more cohesively by managing their documents in a centralized, role-based environment

# Productivity And Collaboration

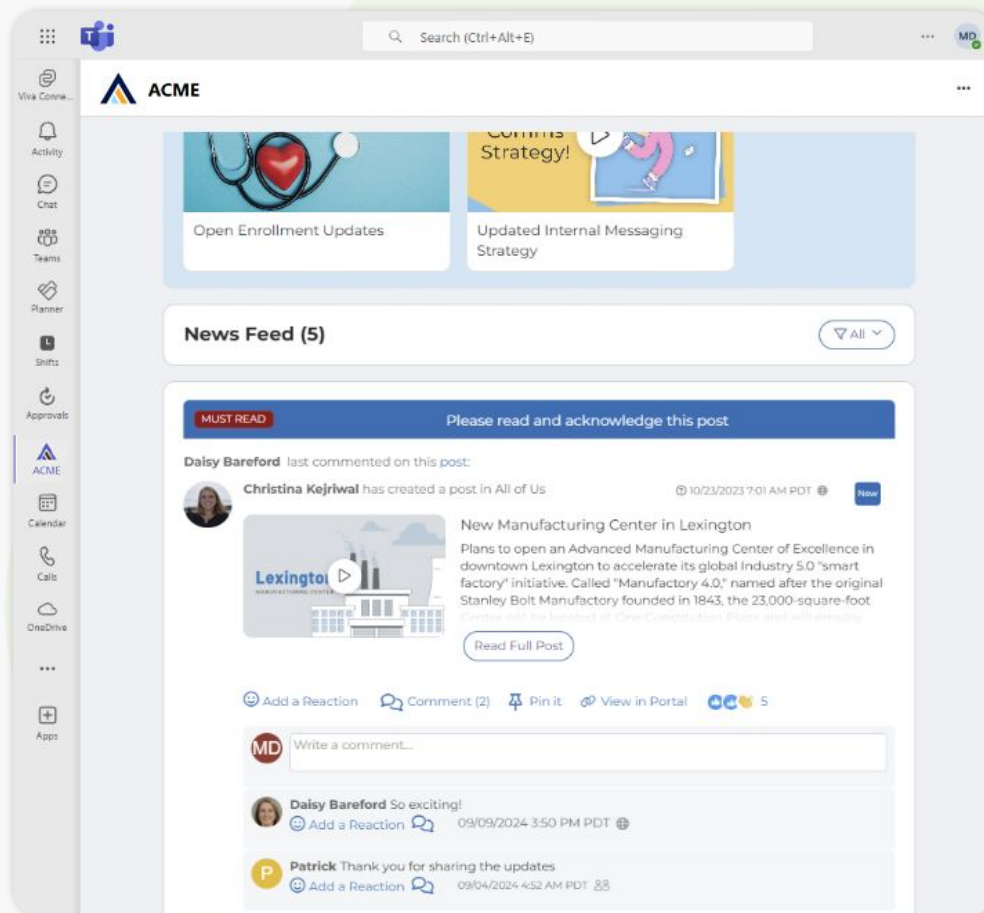

**MangoApps' integrations with additional Microsoft tools, such as Teams, Outlook, Power BI, and Stream, provide real-time updates and streamlined data access.**

- A Native Microsoft Teams App to keep your staff connected without having to switch platforms.
- Create a unified workspace where users can manage schedules, tasks, emails, and data all in one place.
- Increase efficiency is achieved by embedding Outlook, Tasks, and Power BI within MangoApps widgets.
- Enhance collaboration with easy access to MS Stream, Mail, and Power BI, facilitating seamless integration of these tools into everyday workflows.

# Native App for MS Teams

Allow your desk workers to stay connected and engaged within the MangoApps ecosystem without leaving Teams.

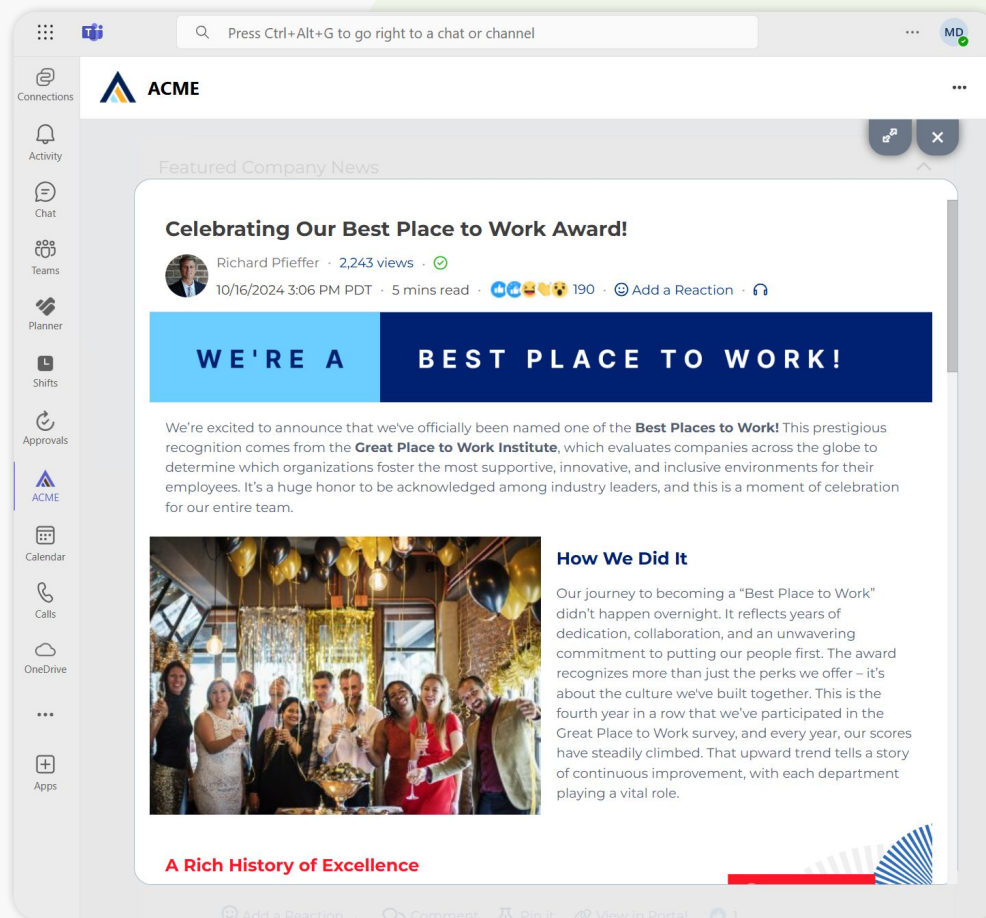

- Get our the MangoApps App from the Microsoft Teams store to start using it directly within your Microsoft Teams environment.
- View, comment, and react within Microsoft Teams.
- Admins install MangoApps app in Teams' left navigation.
- Ensure all employees access MangoApps content in Teams.
- Deliver "New Post" notifications to Teams channels.

# Native App for MS Teams Cont.

Once downloaded, the MangoApps x MS Teams app provides a cohesive experience for users across environments.

- Fully white label the app to match your company's unique branding.
- Open Posts directly within Microsoft Teams for seamless interaction.
- Utilize the integrated File viewer in the Microsoft Teams app for convenient, view-only access to files.
- Access all MangoApps feeds in the Microsoft Teams app using the "Recommended" News Feed view.

The screenshot displays the Microsoft Teams interface with the MangoApps app integrated. The left sidebar shows navigation options: Connections, Activity, Chat, Teams, Planner, Shifts, Approvals, ACME (selected), Calendar, Calls, OneDrive, and Apps. The main content area shows a news feed for the company 'ACME'. The featured post is titled 'Celebrating Our Best Place to Work Award!' by Richard Pfeffer, with 2,243 views and 190 reactions. The post includes a blue and white banner that reads 'WE'RE A BEST PLACE TO WORK!'. Below the banner, the text reads: 'We're excited to announce that we've officially been named one of the **Best Places to Work!** This prestigious recognition comes from the **Great Place to Work Institute**, which evaluates companies across the globe to determine which organizations foster the most supportive, innovative, and inclusive environments for their employees. It's a huge honor to be acknowledged among industry leaders, and this is a moment of celebration for our entire team.' An image shows a group of employees celebrating with champagne. The post also includes a section titled 'How We Did It' with the text: 'Our journey to becoming a "Best Place to Work" didn't happen overnight. It reflects years of dedication, collaboration, and an unwavering commitment to putting our people first. The award recognizes more than just the perks we offer – it's about the culture we've built together. This is the fourth year in a row that we've participated in the Great Place to Work survey, and every year, our scores have steadily climbed. That upward trend tells a story of continuous improvement, with each department playing a vital role.' At the bottom of the post, there is a red banner that reads 'A Rich History of Excellence'.

# Outlook Calendar

Display your Outlook Calendar in a MangoApps widget.

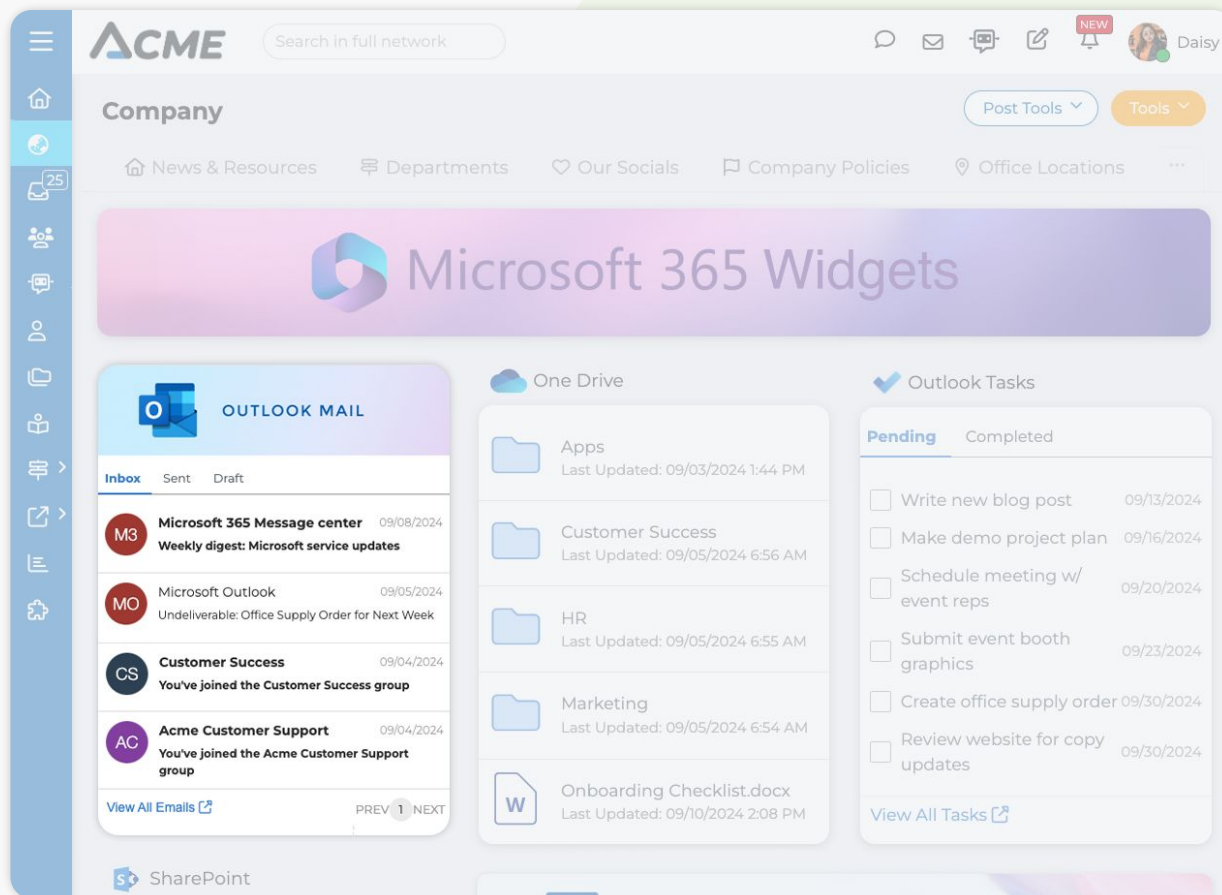

- Get real-time schedule updates directly in MangoApps.
- Export MangoApps calendars to Outlook or iCal formats.
- Keep your schedule unified and up-to-date on all devices.

The screenshot shows the MangoApps interface for a company named ACME. The main navigation bar includes a search bar and various utility icons. Below the navigation, there are sections for 'Company News & Resources', 'Onboarding', 'Policies', and 'Learning'. The central focus is the 'OUTLOOK CALENDAR' widget, which displays a calendar for September 2024. The calendar shows several events: 'Team Meeting' on Monday 01, 08, 15, 22, and 29; 'Leadership M...' on Thursday 05, 12, 19, 26, and 03; and 'Office Supply L...' on Tuesday 02. To the right of the calendar, there is an announcement for 'ANNUAL Clothing Drive' by Marcus Zemlak, dated 03/14/2023 4:56 PM EDT. Below the announcement is a section for 'INTERNAL JOB OPENING'.

# Outlook Mail

Streamline communication in one central platform.

- Quickly access your inbox with the Outlook Mail widget.
- View incoming and outgoing emails instantly.
- Check emails without leaving the MangoApps platform.

The screenshot displays the MangoApps interface for a company named ACME. At the top, there is a search bar for the full network and a user profile for Daisy. Below this is a navigation bar with links for News & Resources, Departments, Our Socials, Company Policies, and Office Locations. A prominent banner for Microsoft 365 Widgets is visible. The main content area features several widgets: Outlook Mail, One Drive, Outlook Tasks, and SharePoint. The Outlook Mail widget is the central focus, showing an inbox with several emails.

**Outlook Mail Widget Content:**

Icon	Subject	Date
M3	Microsoft 365 Message center Weekly digest: Microsoft service updates	09/08/2024
MO	Microsoft Outlook Undeliverable: Office Supply Order for Next Week	09/05/2024
CS	Customer Success You've joined the Customer Success group	09/04/2024
AC	Acme Customer Support You've joined the Acme Customer Support group	09/04/2024

Navigation: View All Emails | PREV 1 NEXT

**One Drive Widget Content:**

Folder	Last Updated
Apps	09/03/2024 1:44 PM
Customer Success	09/05/2024 6:56 AM
HR	09/05/2024 6:55 AM
Marketing	09/05/2024 6:54 AM
Onboarding Checklist.docx	09/10/2024 2:08 PM

**Outlook Tasks Widget Content:**

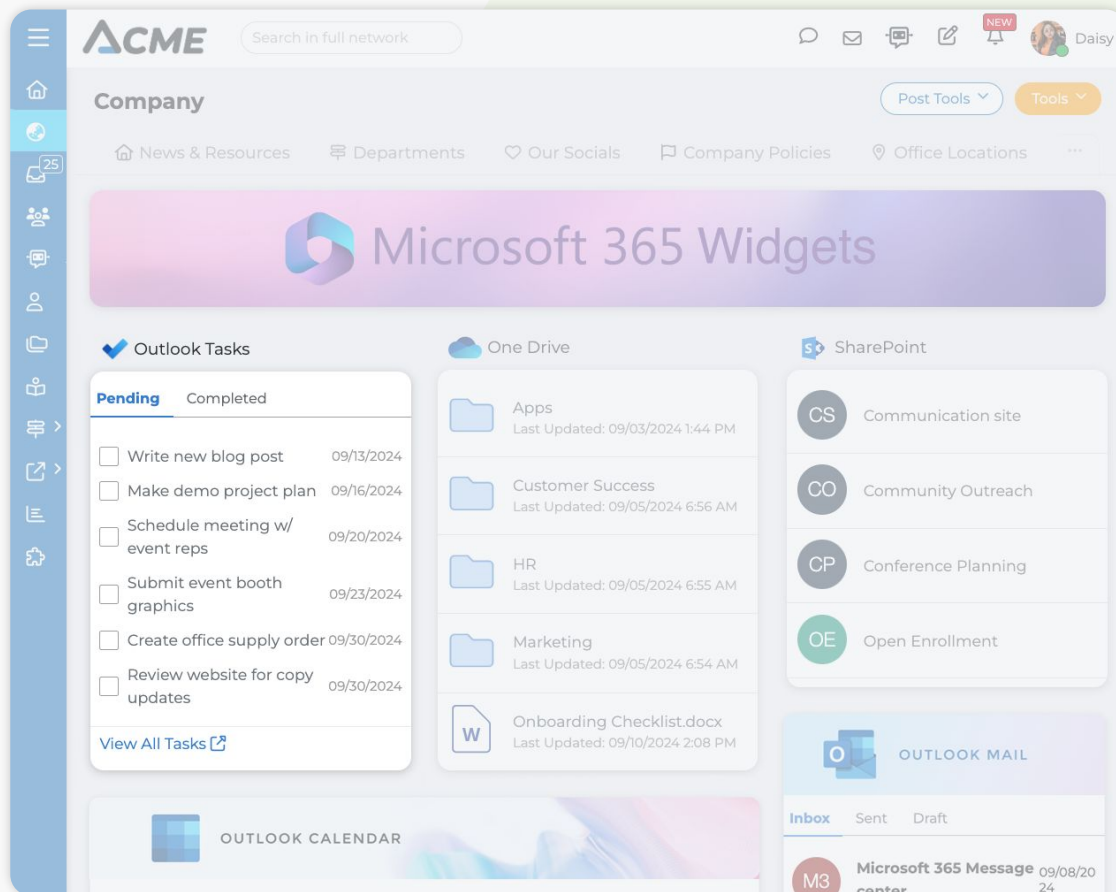

Task	Due Date
<input type="checkbox"/> Write new blog post	09/13/2024
<input type="checkbox"/> Make demo project plan	09/16/2024
<input type="checkbox"/> Schedule meeting w/ event reps	09/20/2024
<input type="checkbox"/> Submit event booth graphics	09/23/2024
<input type="checkbox"/> Create office supply order	09/30/2024
<input type="checkbox"/> Review website for copy updates	09/30/2024

Navigation: View All Tasks

# Outlook Tasks

View and manage tasks in real-time within MangoApps.

- Complete tasks and stay organized without juggling apps.
- Keep your to-do list visible and maintain productivity.

The screenshot displays the MangoApps interface for a user named Daisy. The top navigation bar includes the ACME logo, a search bar, and various utility icons. Below the navigation bar, there are tabs for 'Company', 'News & Resources', 'Departments', 'Our Socials', 'Company Policies', and 'Office Locations'. A prominent banner for 'Microsoft 365 Widgets' is visible. The main content area is divided into three columns:

- Outlook Tasks:** A table showing a list of pending tasks with their due dates.
 

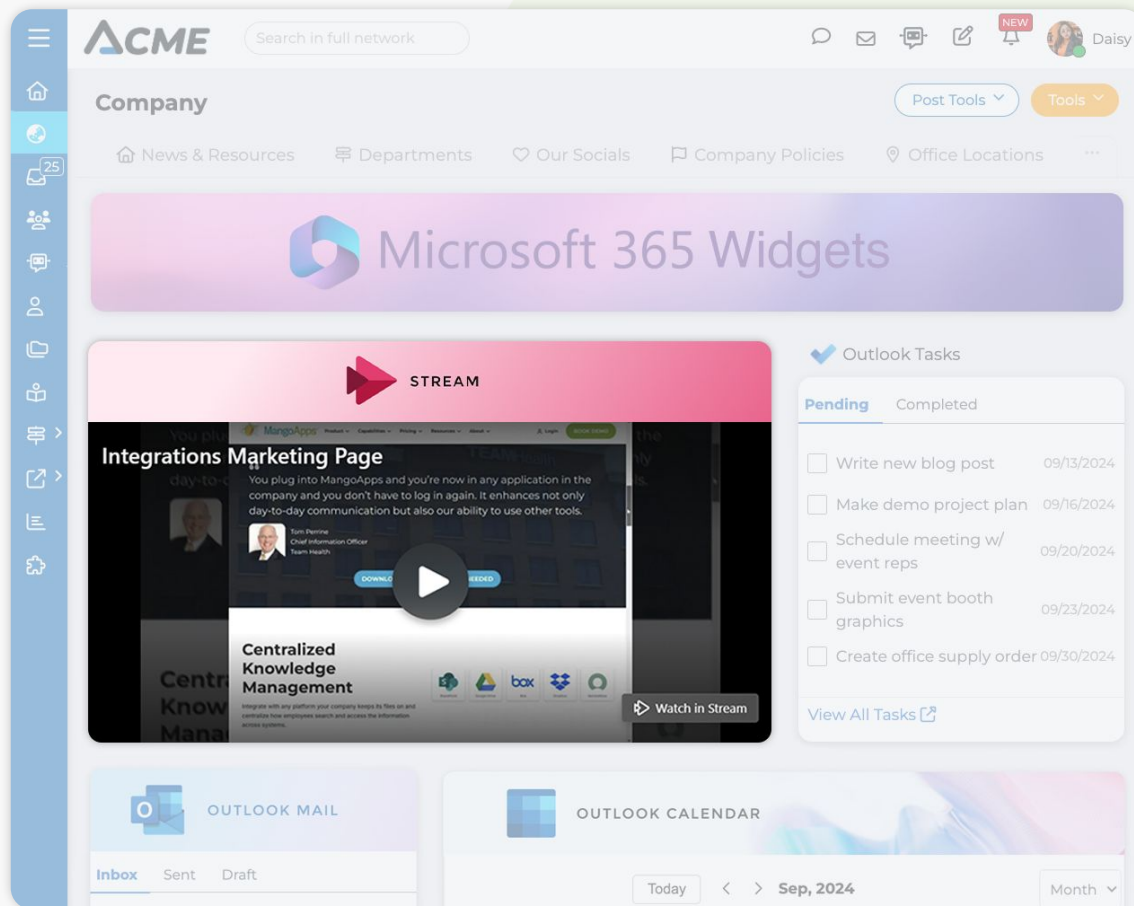

Pending	Completed
<input type="checkbox"/> Write new blog post	09/13/2024
<input type="checkbox"/> Make demo project plan	09/16/2024
<input type="checkbox"/> Schedule meeting w/ event reps	09/20/2024
<input type="checkbox"/> Submit event booth graphics	09/23/2024
<input type="checkbox"/> Create office supply order	09/30/2024
<input type="checkbox"/> Review website for copy updates	09/30/2024
- One Drive:** A list of folders and documents with their last updated times.
  - Apps (Last Updated: 09/03/2024 1:44 PM)
  - Customer Success (Last Updated: 09/05/2024 6:56 AM)
  - HR (Last Updated: 09/05/2024 6:55 AM)
  - Marketing (Last Updated: 09/05/2024 6:54 AM)
  - Onboarding Checklist.docx (Last Updated: 09/10/2024 2:08 PM)
- SharePoint:** A list of sites.
  - CS - Communication site
  - CO - Community Outreach
  - CP - Conference Planning
  - OE - Open Enrollment

At the bottom, there are sections for 'OUTLOOK MAIL' (Inbox, Sent, Draft) and 'OUTLOOK CALENDAR'.

# Microsoft Stream

Access video resources without switching platforms.

- Watch videos, comment, and view analytics in MangoApps.
- Integrate video learning and collaboration into workflows.

The screenshot displays a company intranet interface for 'ACME'. At the top, there is a search bar and navigation links for 'Company', 'News & Resources', 'Departments', 'Our Socials', 'Company Policies', and 'Office Locations'. A prominent banner for 'Microsoft 365 Widgets' is visible. Below this, a video player is embedded, showing a video titled 'Integrations Marketing Page' with a play button overlay. The video content includes text about MangoApps integration and a 'Watch in Stream' button. To the right of the video player is a 'Pending' Outlook Tasks list with items like 'Write new blog post' and 'Make demo project plan'. At the bottom, there are sections for 'OUTLOOK MAIL' (Inbox, Sent, Draft) and 'OUTLOOK CALENDAR' (Today, Sep, 2024, Month view).

# Power BI

Bring data insights directly into MangoApps.

- Access critical analytics without leaving the platform.
- Give frontline staff insights without additional licenses.
- Support data-driven decisions and inform all team members.

Add Power BI reports to MangoApps dashboards.

- Use Power BI widgets for easy access and sharing.
- Customize with iframe for better data display control.

The screenshot shows the ACME MangoApps dashboard. At the top, there's a search bar and navigation icons. Below that, a 'Company' section with various links like 'News & Resources', 'Departments', etc. A prominent 'Microsoft 365 Widgets' banner is visible. The main content area features a Power BI widget with the following data:

**Remediation Item Statuses**

Status	Count	Percentage
In Progress	1	4.76%
Complete	4	19.05%
Not Started	6	28.57%
Status	10	47.62%

**Remediation Items by Auditor**

Auditor	No. of Items
Tina Wu	8
Daniel Maykin	7
Stella Kim	5
Assigned To	1

**Remediation Items by Location**

Location	No. of Items
Chicago Office	3
Mexico City Distribution Center	2
Berlin Facility (Manufacturing)	2
British Columbia Office	2
Connecticut Office	2
Montreal Office	1
Olympia Office	1
Omaha Distribution Center	1
Ottawa Office (Sales)	1
Sacramento Distribution Center	1
Site	1
Sonora Office (Sales)	1

On the right side of the dashboard, there's an 'Outlook Tasks' section with a list of pending tasks and their due dates, and an 'Outlook Mail' section showing an inbox with a message from Microsoft 365.

# Productivity & Collaboration

## How Customers Use This:

Enterprises streamline productivity by integrating Microsoft tools directly into MangoApps. For instance, staff can view their Outlook calendar directly within MangoApps to keep track of meetings and appointments.

The Outlook Mail widget allows employees to stay on top of communications without leaving the intranet, while the Outlook Tasks integration helps them prioritize and complete to-dos directly from the dashboard. Teams use the Power BI widget on team pages or project hubs, making it easy to monitor KPIs and progress.

Customers also deploy the Native Microsoft Teams App to make MangoApps content available directly inside Teams. This ensures employees working primarily in Teams can still view and respond to company updates, complete forms, or collaborate on shared docs—all without switching tools.

Additionally, teams embed Microsoft Stream videos for onboarding, training, or internal announcements, creating a more interactive and multimedia-rich environment.

## Benefits:

- **Reduces context switching:** Employees can manage email, calendars, tasks, and dashboards from a single interface
- **Boosts team alignment:** Real-time access to calendars and tasks ensures everyone stays on track
- **Strengthens communication:** Embedded Outlook and Teams integrations centralize messages and updates
- **Empowers data-driven decisions:** Power BI widgets deliver business insights to everyone, even without a Power BI license
- **Supports modern workflows:** Embedded Microsoft Stream videos enhance training and knowledge sharing
- **Increases adoption and engagement:** Familiar Microsoft tools integrated into MangoApps lower the barrier to use and improve employee engagement
- **Unifies digital workspace:** A single hub to access work tools, communication, content, and collaboration

# Security, Analytics, & User Management

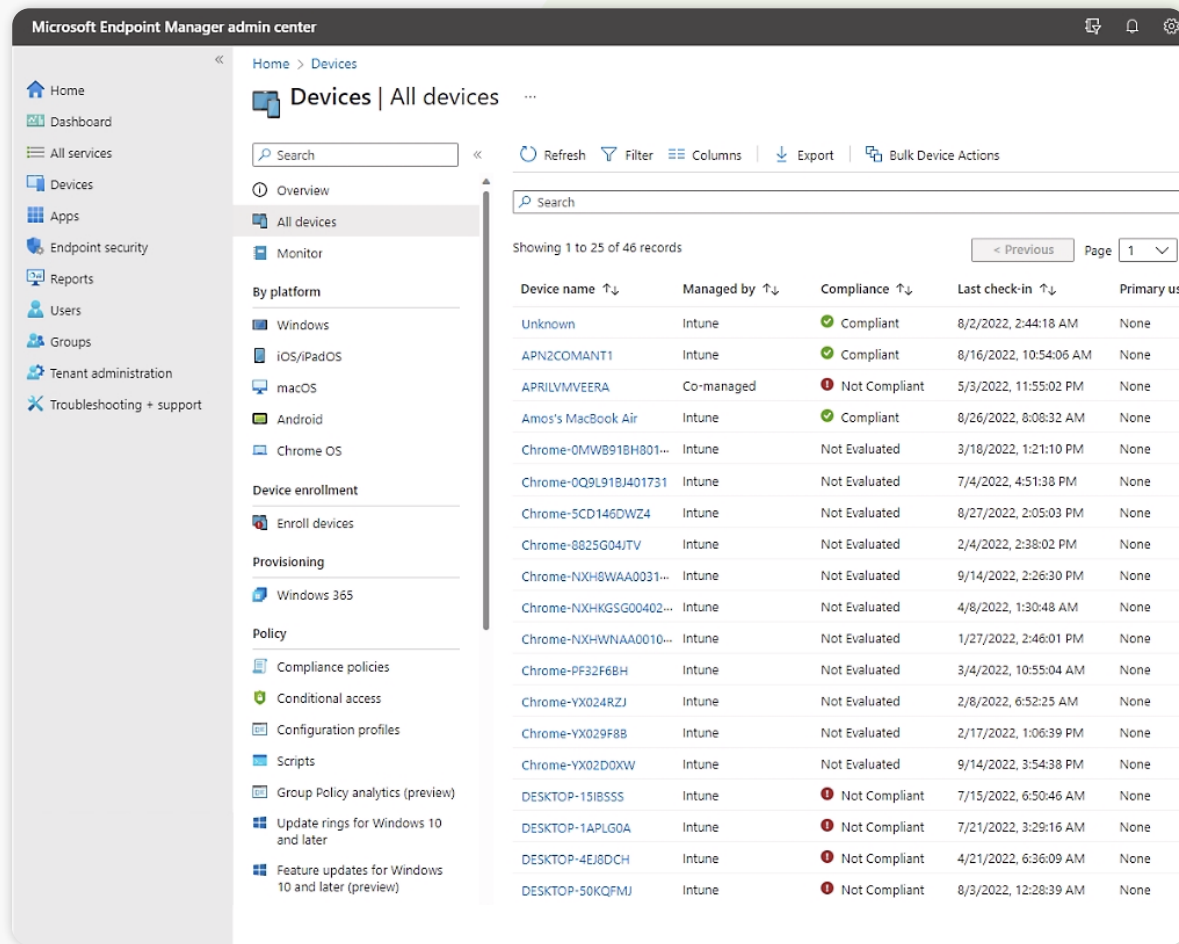

**MangoApps' integration with Microsoft user management and IT tools, like Intune and Clarity, enhance the platform's overall security, efficiency, and usability.**

- Improve security and compliance by ensuring that only secure devices can access MangoApps.
- Provide valuable insights for data-driven decisions by offering deep user behavior analytics
- Streamline IT and user management, optimizing access and platform management for a more cohesive digital experience.

# Intune

Deploy MangoApps securely via Microsoft Intune.

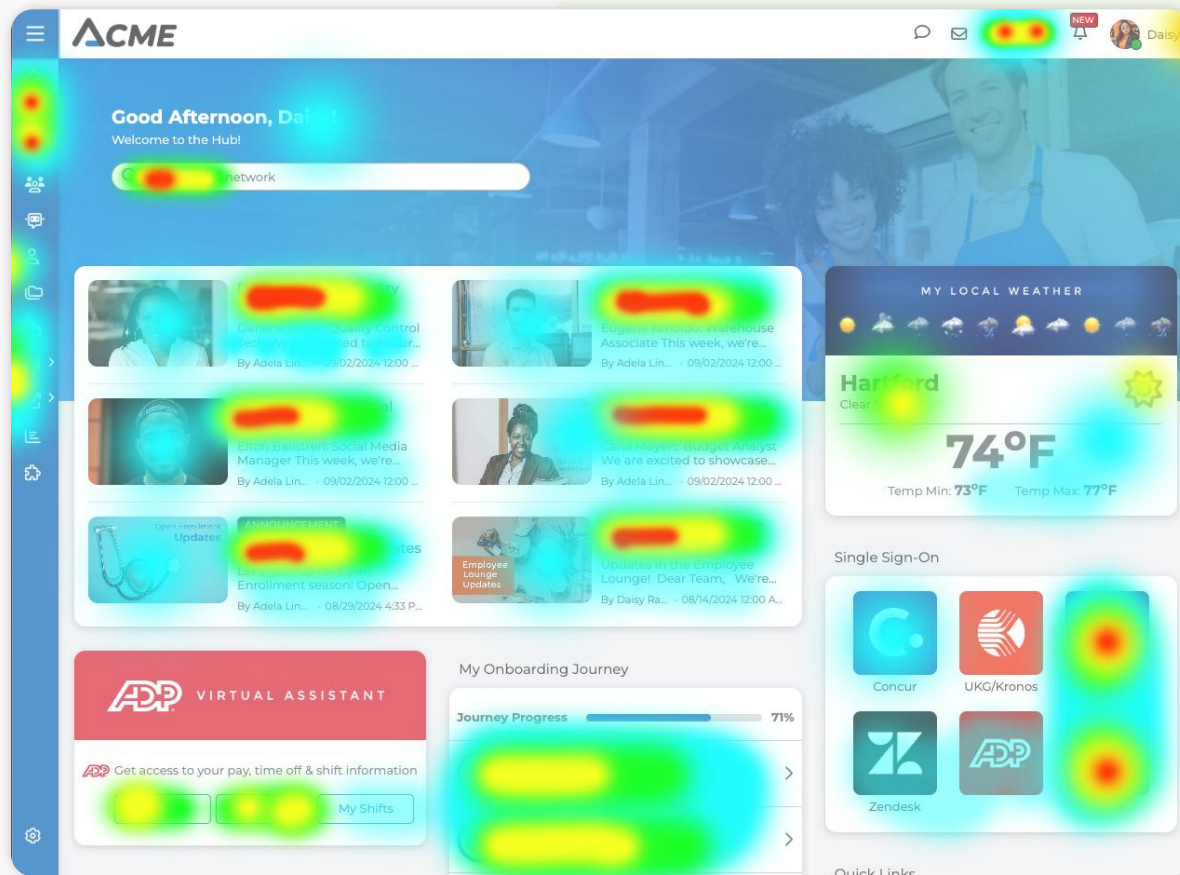

- Ensure MangoApps is secure on all devices.
- Enforce security policies and remote management.
- Manage apps and devices from one place.
- Allow only secure, compliant devices to access MangoApps.
- Enhance security with versatile deployment options.

# Clarity

Optimize platform experience with user behavior insights.

- View heatmaps and session recordings of user interactions.
- Study user behavior within MangoApps.
- Refine workflows and enhance usability with insights.
- Spot usage trends and areas for improvement.
- Create a more intuitive platform based on real interactions.

# Security, Analytics & User Management

## How Customers Use This:

Enterprises streamline productivity by integrating Microsoft tools directly into MangoApps. For instance, staff can view their Outlook calendar directly within MangoApps to keep track of meetings and appointments.

The Outlook Mail widget allows employees to stay on top of communications without leaving the intranet, while the Outlook Tasks integration helps them prioritize and complete to-dos directly from the dashboard. Teams use the Power BI widget on team pages or project hubs, making it easy to monitor KPIs and progress.

Customers also deploy the Native Microsoft Teams App to make MangoApps content available directly inside Teams. This ensures employees working primarily in Teams can still view and respond to company updates, complete forms, or collaborate on shared docs—all without switching tools.

Additionally, teams embed Microsoft Stream videos for onboarding, training, or internal announcements, creating a more interactive and multimedia-rich environment.

## Benefits:

- **Enhances data security:** Enforce secure access policies and device compliance using Microsoft Intune
- **Simplifies IT management:** Remotely deploy, configure, and control MangoApps access across the organization
- **Ensures compliance at scale:** Restrict access to corporate-approved devices only, reducing risk of data leaks
- **Improves user experience:** Clarity reveals real user behavior—helping teams make data-informed design decisions
- **Boosts platform adoption:** Insights into how employees use MangoApps help optimize onboarding and content placement
- **Supports continuous improvement:** Ongoing analytics enable admins to adapt the platform to user needs and maximize ROI
- **Strengthens IT & security alignment:** Leverages Microsoft tools IT teams already trust to extend protection and oversight to MangoApps

# Additional Integrations & Services

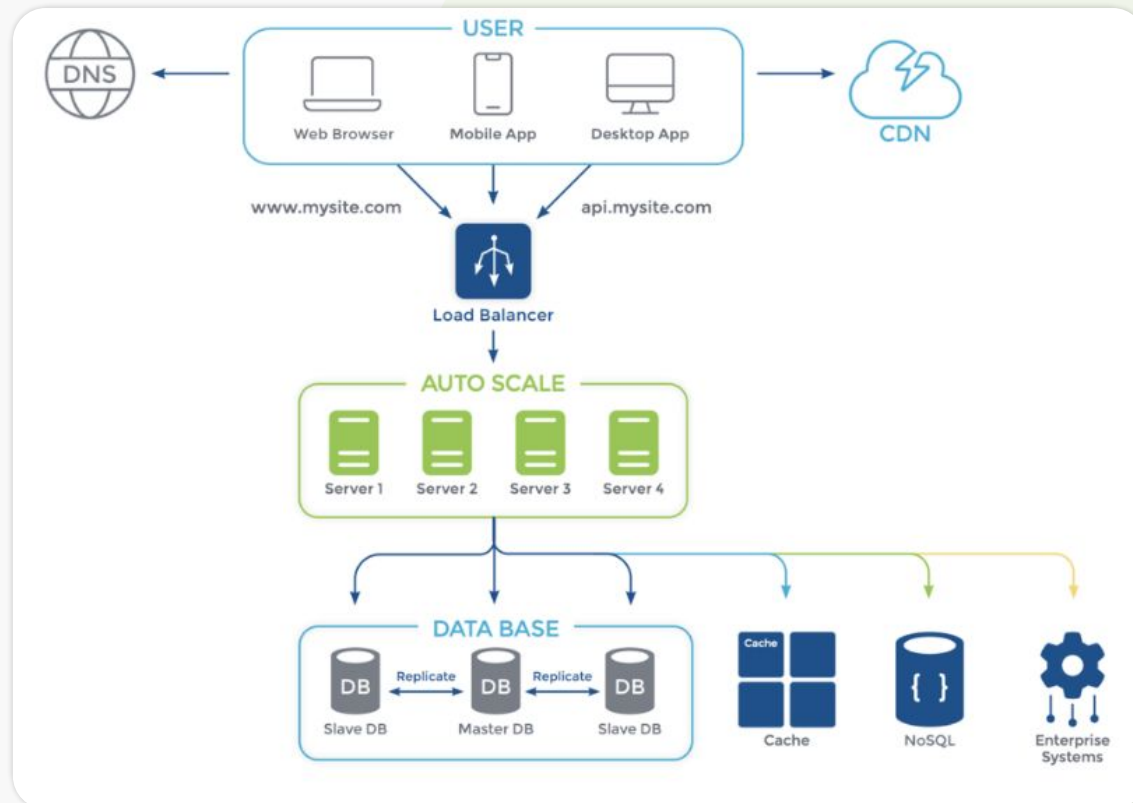

**MangoApps provides additional integrations and services to ensure organizations using Microsoft 365 enjoy seamless connectivity to MangoApps, including:**

- Hosting your MangoApps instance on Azure
- Integrating with Microsoft Synapse/Data Lake for User Provisioning & Analytics
- File migration services to streamline the transition from SharePoint to MangoApps.

# Azure Private Cloud Hosting

Host your MangoApps instance on Azure.

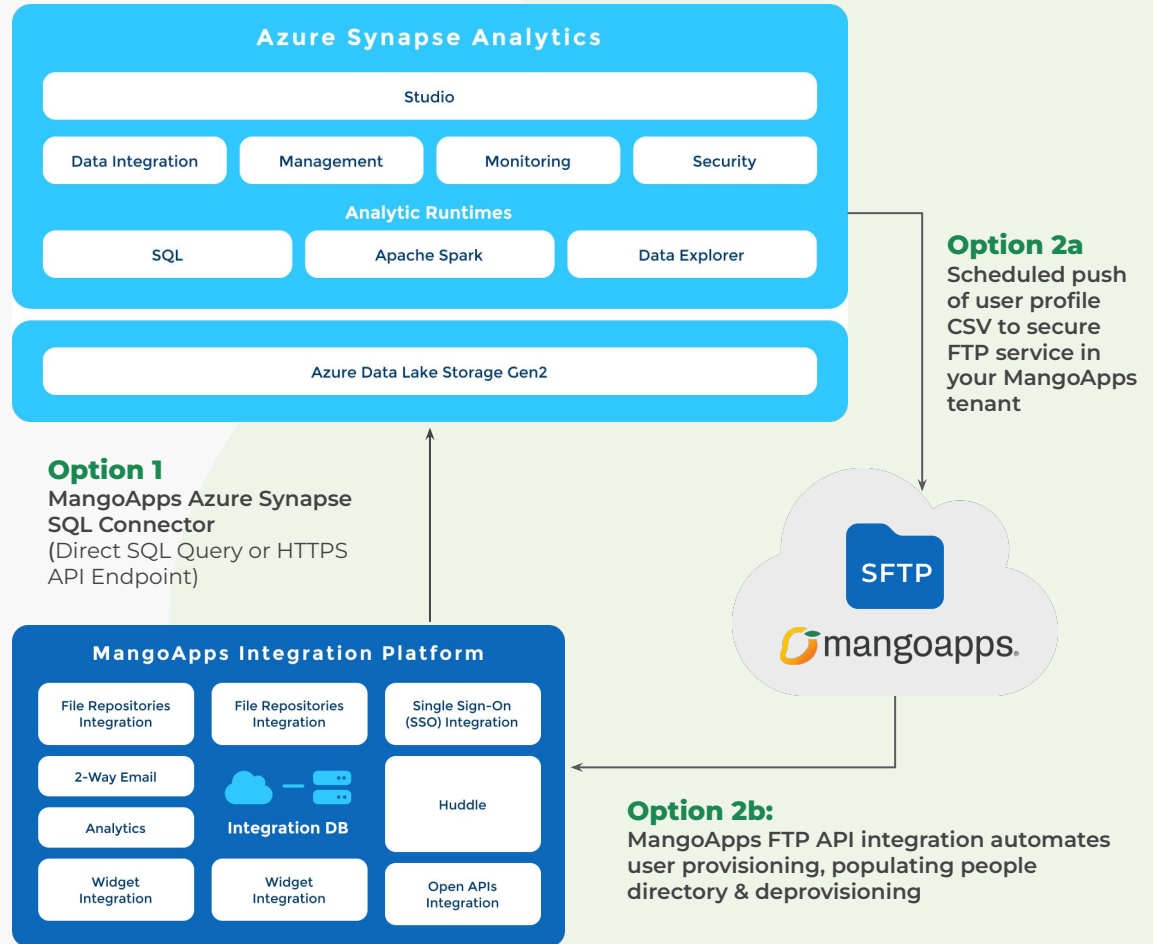

- Fully managed private cloud setup.
- Offer flexibility for better business alignment.

# Integrate With Azure Synapse

Easily integrate MangoApps with Azure Synapse or Data Lake for streamlined data and user management.

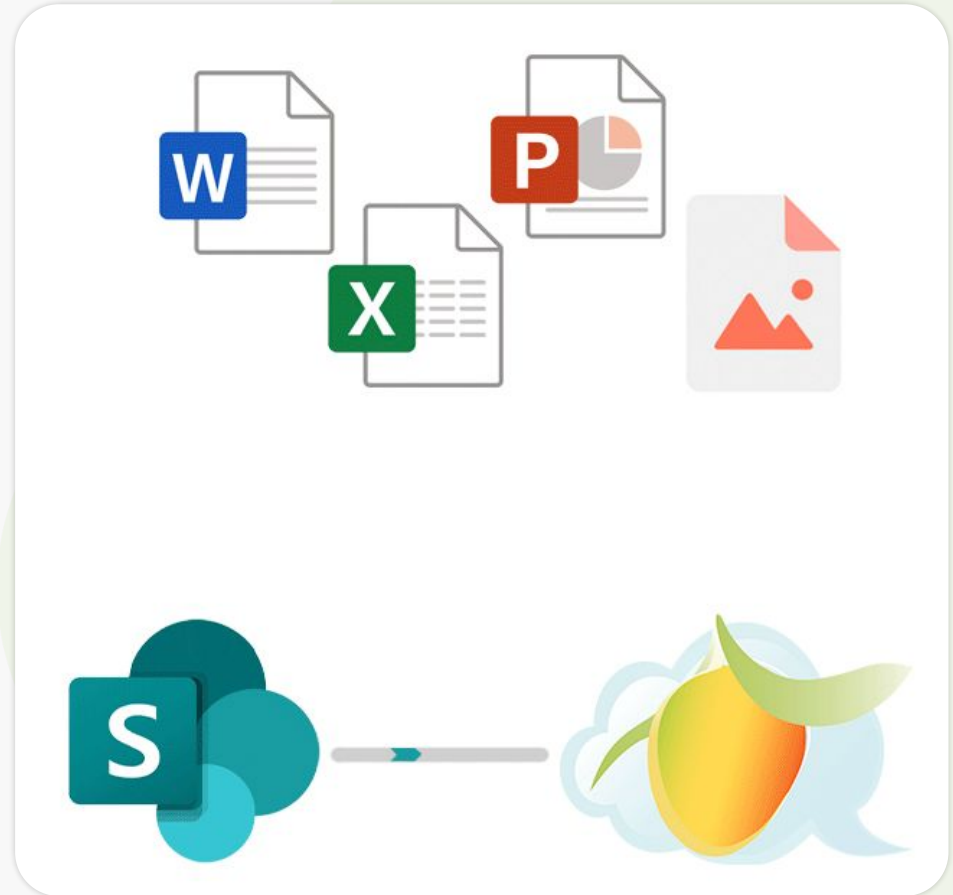

- Direct SQL queries or HTTPS API endpoint.
- Scheduled CSV push and automated FTP-Based processing.

# File Migration Services

MangoApps offers comprehensive content migration services to help streamline the transition from SharePoint to MangoApps, ensuring a smooth and efficient process.

- Move files and content from SharePoint to MangoApps.
- Manage all documents in one platform.

# Additional Integrations & Services

## How Customers Use This:

Organizations with existing Microsoft infrastructure use MangoApps' advanced integration services to create a fully aligned and scalable digital workplace. By hosting MangoApps in Azure, enterprises gain greater control over performance and data compliance.

Customers also integrate MangoApps with Azure Synapse or Data Lake to streamline analytics, reporting, and user provisioning. For instance, HR and IT teams can use MangoApps' FTP/API-based integration to automatically sync employee profiles, populate directories, and manage role-based access controls—all from centralized Microsoft systems.

During SharePoint transitions, MangoApps provides file migration services, ensuring a seamless move to a modern, centralized collaboration hub.

## Benefits:

- **Flexible hosting options:** Azure-based hosting offers reliability, scalability, and adherence to enterprise IT standards
- **Streamlined user provisioning:** Automate user and profile management via Synapse, Data Lake, or FTP/API integrations
- **Enhanced data visibility:** Enable advanced reporting and analytics by integrating with existing Microsoft data infrastructure
- **Simplifies migration:** Expert-guided file migration from SharePoint reduces friction and ensures a seamless transition
- **Scales with your business:** Tailored integration options ensure MangoApps fits into complex enterprise environments
- **Supports long-term IT alignment:** Deep Microsoft compatibility ensures future growth and integration are fully supported

**Thank You**
